ROHAN N V

RPA DEVELOPER

Bengaluru, India 560085 • 9901968004 • vasanthrohan2@gmail.com

Dear Recruiters,

Please consider me for the robotic process automation opportunity. I am including my resume that lists my qualification and experience.

Previously, I have worked on different clients to process their requirements and successfully created and delivered the bots. I even served myself part of business analyst team for requirement gathering, creation of Business requirement documentations.

I reviewed the requirements for the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience will include:

- Requirement Gathering from clients.
- Creating BRD, PDD & SDD documentations.
- Create business cases to support these opportunities.
- Deliver end to end RPA roadmaps and blueprints.
- Advise clients on industry best practices.
- Stay updated with the latest technologies.
- Expertly use of MS Office tools.

I would be happy to go over my credentials in more detail. I appreciate your consideration and time, and I hope to hear from you soon.

Sincerely,

Rohan N V
